

7055

Workgroup Document System

Konica

A Networkable 55ppm Printer/Copier.

Introducing the Konica 7055, the most cost-effective solution for bringing high-volume copying and printing directly to the workgroup user. The 7055 gives you a choice of finishing options for the kind of high-end finishing features you'd expect to find on top of the line enterprise production systems. And with the addition of Konica's 5th generation print controller, the IP-303, the 7055 gives you something many enterprise systems can't: easy networkability and incredible versatility. When the 7055 is connected to the IP-303 it supports simultaneous tandem print and tandem copy, making the 7055 as productive a system as it is versatile. The Konica 7055 is the perfect solution for businesses that want all the advantages of high-volume production printing without the big investment.

7055 Highlights

- ▶ 55 ppm Printing/Copying
- ▶ Real-time/Dual Scanning Technology
- ▶ Heavy Stock Availability (Up To 65 lb. Cover)*
- ▶ Choice Of Standard Or Booklet Maker Finishing Options
- ▶ Simultaneous Tandem Copy/Tandem Print
- ▶ Intuitive Touch Screen Controls
- ▶ Total Paper Capacity Of 7,100 Sheets With Optional LCT
- ▶ Optional IP-303 Print Controller For Full Networkability

* through multi-sheet bypass tray

7055

Workgroup Document System

Features

► **Real-time/Dual Scanning Technology:**

Originals scanned face up from the document feeder pass over the fixed scanner, reducing moving parts and improving performance and reliability. Originals scanned from the platen remain stationary while the scanner moves across the platen.

► **Heavy Stock Availability:**

Feed heavy stock (up to 65 lb. cover) through bypass. Perfect for production-quality booklets, pamphlets and reports.

► **Workgroup Workhorse:**

With a maximum recommended volume of 300,000 prints-per-month and an increased toner capacity of 33,000 impressions, the Konica 7055 is the high-volume solution for the high-volume workgroup.

► **Simultaneous Tandem Copy and Tandem Print:**

The Konica 7055 joins the 7065 as the only digital products to offer both tandem printing and tandem copying at the same time. Producing up to 110 pages-per-minute as either a printer or copier.

► **Production Finishing:**

Choose either the standard 2,200-sheet finisher with 8-position stapling or the optional 3,200-sheet booklet maker with folding, saddle stitching and optional post sheet insertion.

► **Electronic Recirculating Document Handler (ERDH):**

Originals are received and stored as compressed digitized data for unlimited set production.

► **Large Capacity Paper Tray:**

Doubles standard capacity from 3,600 to 7,100 sheets.

► **Page Printer/Document Printer:**

With the optional IP-303 print controller, the 7055 can perform both page printing and document printing.

The Konica 7055 is the most cost-effective solution for bringing high-volume copying and printing directly to the workgroup. The digital 7055 delivers a fast and efficient 55 pages-per-minute. It's high-end finishing features are similar to those found on the most sophisticated enterprise production systems. With the addition of Konica's 5th generation print controller, the IP 303, the 7055 gives any end user easy access to the kind of print on demand system today's office requires. The 7055's simultaneous tandem print and tandem copy capabilities make it a highly versatile high-volume solution.
